

ITEM 4.10.14 | ELEVATORS - EMERGENCY COMMUNICATIONS

If provided, emergency two-way communication systems between the elevator and a point outside the hoistway shall comply with ASME A17.1-1990. The highest operable part of a two-way communication system shall be a maximum of 48 in (1220 mm) from the floor of the car. It shall be identified by a raised symbol and lettering complying with 4.30 and located adjacent to the device. If the system uses a handset then the length of the cord from the panel to the handset shall be at least 29 in (735 mm). If the system is located in a doted compartment the compartment door hardware shall conform to 4.27, **Controls and Operating Mechanisms**. The emergency inter communication system shall not require voice
