

ITEM 2.2.9 | SUBMISSION VALIDATION

The Portal shall validate each submission to detect any discrepancies (e.g., incomplete data or unacceptable document type) or other problems (e.g., viruses) before transmission to the clerk of court. The Portal will return a submission to the correction queue if a virus is detected within the submission or if one or more of the documents in the submission is corrupt. The Portal will e-mail the filer immediately if the Portal detects discrepancies or other problems with the submission, based on technical issues. The validation rules will be specific to the type of submission (for example, new case initiation as opposed to filings in an existing case).
