

ITEM 5.6.3 | WORK QUEUE

The system shall have a function for tracking the court's work queue.

5.6.3.1

The judge, when viewing a document or a progress docket, shall have the ability to place a reference to the document directly into the work queue for subsequent action, with the ability to over-ride default due date or such other due date the judge may select.

5.6.3.2

The work queue shall also accept other manually entered items.

5.6.3.3

Each work queue must be able to accommodate the classification of work queue items into separate item types, such as proposed orders, internally generated orders, requests for domestic violence injunctions, warrants, emergency motions, and other user-specified types.
