

ITEM 6.1.0 | BACKGROUND

The Integration and Interoperability requirements and standards are derived primarily from industry best practices and existing standards. The functional requirements of the judicial branch drive the need to define an environment that can fulfill the needs of all justice partners as they interact with the public and other federal, state, and local agencies. The hardware and software platforms, network infrastructure, and methods for data exchange that are discussed and recommended in this document support the strategic vision of the Florida Courts Technology Commission ("FCTC") relative to integration and interoperability among heterogeneous systems.
